

Custom Make

Superior quality due to genetic difference to mammals.

Norwegian Antibodies offers an exclusive chicken antibody custom make service adapted to customer requirements.

We need 1mg antigen for immunization. The purity needs to be 98%. We obtain the antigen in question either from the preferred supplier or the customer supply us the antigen of their choice.

If the antigen is unknown to us we need to know PI for the antigen and the size. We also need to know if there are any chemical conditions regarding handling of the antigen such as low pH, special acids and so on.

The project includes antigen affinity purification. To make the purification column we need 10mg additional antigen of 30% purity or better. 15 weeks after we receive the antigen we will deliver 35mg of antigen affinity purified chicken antibodies.

To continue immunizing after the first 16 weeks we need 0,1 mg antigen every 4 weeks the rest of the production period.

Cost: 1300 EURO

Additional deliverance at standard price

Please contact us for further information and individual arrangements.
