We have produced samples of purified antibodies specifically reacting with one of the following antigens:

Human Disease Markers

- Antigen affinity purified chicken anti human C-reactive protein (CRP) antibodies
- Antigen affinity purified chicken anti human heart myoglobin antibodies
- Antigen affinity purified chicken anti Cystatin C antibodies
- Antigen affinity purified chicken anti human liver Ferritin antibodies
- Antigen affinity purified chicken anti human PSA antibodies

Bacterial Proteins

- Antigen affinity purified chicken anti Protein A antibodies
- Antigen affinity purified chicken anti Protein G antibodies

Animal Immunoglobins

- Antigen affinity purified chicken anti mouse IgG antibodies
- Antigen affinity purified chicken anti mouse IgG FC fragment antibodies
- Chicken anti rabbit IgG FC antibodies (Antigen affinity purified on request)

Animal serum proteins

- Antigen affinity purified chicken anti Bovine Serum Albumin antibodies

Human Blood Proteins

- Antigen affinity purified chicken anti human serum Transferrin antibodies
- Antigen affinity purified chicken anti human Hemoglobin antibodies
- Antigen affinity purified chicken anti human Fibrinogen antibodies

Human Immunoglobulins

- Antigen affinity purified chicken anti human IgA antibodies
- Antigen affinity purified chicken anti human IgG FC antibodies
- Antigen affinity purified chicken anti human IgM antibodies
- Chicken anti human IgE antibodies (Antigen affinity purified on request)

Human serum proteins

- Antigen affinity purified chicken anti Human Serum Albumin antibodies

Albumin from chicken egg white

- Ovalbumin; Albumin from hen egg white
